"MyMy" was from a two puppy litter. Although not bred at Geran's we took her in at 11 months. We knew from the first day she arrived that there was no doubt that she was very special. Her beauty and gorgeous movement were the first thing you noticed. She just oozed with breed type. I owner handled her for several of her points before turning her over to a handler. MyMy never went to a show without me and never stayed with anyone but me so we were forced to do selected shows which prolonged her finishing till she was almost four.

MyMy has proved to be a top producer. Being bred only 4 times in those 4 litters She has produced 8 champions to date, 5 from her GV Honky Tonk litter with several more closing in on their Championships. Even though MyMy herself is retired from the whelping box we are still seeing her influence through her progeny who are producing My My's suspended and correct sidegait along with her incredible shoulder.

MyMy has always been full of herself and at 9 years old she is still Queen at Geran's Kennels.

Gerald W. Roach
